## NORMAL SCHOOL.

### COMMENCEMENT WEEK.

The exercises of commencement week began on Sunday afternoon at 3 o'clock, when the baccalaureate sermon was preached in the Auditorium by Rev. Dr. Harris, President of Bucknell University at Lewisburg. His text was "What think ye of Christ?" and he handled the subject in a very entertaining and instructive manner. On Monday evening there was a Historical Recital by the Junior Class. The program consisted of music, an address by Fred Sutliff, President of the class, the Pre-Columbian period, with scenes from Longfellow's Hiawatha; the Colonial Period, with scenes from "Standish of Standish"; the Revolutionary Period, with scenes from "The Spy" by Cooper; the Slavery Period, with scenes from "Uncle Tom's Cabin", and the Present Period. Those taking part appeared in costume, and the entertainment was a very interesting one. The members of the Class of '94 are the following;

Wednesday evening at 8 o'clock the Class of '93—one hundred thirteen strong gave to the vast audience a very timely and well chosen programme. Prominent numbers in the exercises was a beautiful essay by Miss Thomas of Kingston, and an oration by Mr. John J. O'Donnell.

There was, too, the usual class history, poem, prophecy, and statistics, each of which contained its full quota of quaint wit and quiet humor.

### CLASS MEMORIAL

The Class memorial was of an entirely different turn than ever before presented.

Instead of putting their funds into some perishable thing in the way of apparatus,—valuable though these always are—the Class of 93 decided to leave with the Trustees of the school, in trust, the sum of two hundred dollars ($200.) as an endowment for the education of poor young men and women. It is indeed, a most laudable memorial and ought to be supplemented by succeeding classes to a much greater amount.

## DEATH'S HARVEST.

The silent reaper has been busy in our midst during the past week, among the old, the young, and the middle-aged.

### JAMES K. EYER.

Last week Thursday James K. Eyer passed away at 4 o'clock, after an illness of only a few hours. While out driving before noon, he was seized with severe pains in the region of the heart, and on reaching home a physician was called in, who did all that was possible for his relief, but without avail, and he died at 4 o'clock. Mr. Eyer was conscious of the fact that his end was near, and said he was ready to go. He had often expressed the hope that when his time came, he would be taken suddenly, and not be permitted to undergo a long illness. His wish was gratified.

Mr. Eyer was a son of Philip P. Eyer. He was born May 7, 1817 in Madison township, but moved to Bloomsburg, and was engaged in the mercantile business until within a few years. For a half a century he has been a prominent member of of the Methodist Church. He will be much missed as a class leader and active and earnest worker.

He was twice married, his first wife being Elmira Hollingshead who died in 1882, leaving three children, J. W. Eyer, Mrs. L. N. Moyer and Miss Lettie Eyer. The first wife of J. Saltzer was also her daughter. In 1888 Mr. Eyer married Mrs. Edwards of Light Street, who survives him. The funeral took place on Saturday afternoon, at the residence of L. N. Moyer, the services being conducted by Rev. W. G. Ferguson.

### MRS. A. C. FREAS.

Margaret T., wife of A. Clarence Freas Esq. died at her home on Third street last week Friday morning at 12.15. Her health had been somewhat impaired for some time, but she was not considered in a critical condition until about a week before her death, and only for four days was the end looked for. She was a daughter of George Rothrock of Williamsport, 39 East Third street, and was born Nov. 22, 1861. Her parents survive her, and three sisters, Mrs. A. Praetorius, Mrs. William Q. Lloyd, Sarah M. Rothrock, and one brother, Boyd P. Rothrock, all residing in Williamsport. Her husband and two little children Mary Emily aged 7, and George R. aged 5, also remain to mourn the loss of a devoted wife and mother. She was married to A. Clarence Freas Esq. on February 28, 1883, and they resided in Berwick for one year, and in 1884 they moved to Williamsport and resided there until 1888, when they came to Bloomsburg, and have lived here since. She was a musician of more than ordinary skill, and also an artist, the walls of the home now made desolate bearing many pictures exhibiting a remarkable talent. She graduated at Dickinson Seminary in 1879, and by her many attainments and pleasant disposition she made friends wherever she went. She was of domestic habits, and her chief aim in life was to make home pleasant and to be a model wife and mother. She leaves many friends to mourn her loss, and the sympathy of the community goes out to the bereaved family in their great affliction. The funeral was held at the house on Sunday afternoon at two o'clock, the services being conducted by Rev. W. C. Leverett, rector of St. Paul's Episcopal Church. The remains were buried in Rosemont Cemetery.

### CARRIE JAMESON.

After a long and distressing illness, Caroline, second daughter of Col. and Mrs. John Jameson, died at the Exchange Hotel on Monday morning at two o'clock. For more than a year she has been a patient sufferer. She had a severe attack of scarlet fever, from the effects of which she never recovered. Although everything was done for her that medical skill could do, and the tender nursing of fond parents and sisters could provide, she gradually failed in strength and the ravages of consumption seized upon her delicate frame, and death claimed her for its own. The remains were taken to Milford, New Jersey, on Wednesday. The services were conducted by Rev. I. M. Patterson, pastor of the Presbyterian Church.

### IRA SAYERS.

Ira Sayers died at the home of his daughter Mrs. Blasser, on East street, last Saturday morning at 9 o'clock, aged 84 years. He had at one time time followed rafting, and kept a hotel at Port Trevorton. The funeral took place on Monday afternoon, and the remains were buried at Afton.

### HORACE GINGLES.

Mr. and Mrs. William Gingles of Jerseytown have been called upon to mourn the loss of their son Horace, aged seventeen years, who died last week Wednesday night. He was a student at the Normal School, and was taken sick on Monday and went to his home. It is supposed that his death was due to his going in swimming while overheated.

### E. P. ALBERTSON.

Elijah P. Albertson, well known in the upper end of the county died suddenly on Saturday afternoon at Fairmount Springs. He was plowing corn in a field, when a young man named Shultz saw him fall and went to him, but he only breathed a few times. His death is ascribed to apolexy. For some years he drove the Benton stage and was afterwards proprietor of the Ikeler Hotel at Benton, subsequently he built the Central Park Hotel at Central, and conducted it for a time. For several months he had been living at Fairmount Springs, where his father resides. He leaves a wife and seven children.

### FREDDIE SMITH.

Freddie, son of Mr. and Mrs. A. Smith who reside on Eighth street, died on Thursday of last week, aged ten months. He was buried on Saturday.

### Laid to Rest.

Death invaded the pleasant family circle of Mr. and Mrs. J. B. McHenry, of this town, last Friday morning about 9 o'clock, and called to the great beyond their bright and promising young son, Thomas C., aged about eight years. He was taken ill some two weeks ago with scarlet fever, and despite the efforts of the physician and the most devoted nursing, the bright and promising young flower was plucked by the great reaper and transported beyond the dark river of death to that bright land of perpetual happiness, where sickness is never known and death can never enter, there to join the loved ones gone before, and to be the first to greet those left behind as they land upon the other shore. The funeral occurred last Sunday afternoon and after the solemn and impressive services at the church, the remains were tenderly and sorrowfully laid to rest in Benton's silent city of the dead. The bereaved parents and surviving members of the family have the heartfelt sympathy of the entire community in their dark hour of affliction in the loss of their loved one, but

"When the Saviour bids you enter,
Through the pearly portals wide,
He will be the first to greet you,
Over on the other side:
Happy in the Heavenly mansion,
Clothed in robes so pure and fair,
Singing out a joyous welcome,
You will meet your darling there.

### What Coal Lands are Worth.

The Scranton *Times* is responsible for the following: The lawyers and a few hangers on about the court room in Scranton were discussing the value of an acre of coal land Tuesday. One gentleman said he considered $3,700 a good figure. Attorney Watson pooh hooed the idea of coal land selling at such a figure. He said he knew of a tract of 105 acres in Jermyn, left to Mrs. John Smith's heirs, which was worth $1,000,000. "Twenty thousand dollars an acre," he said, "is a small figure for an acre of coal land." Deputy Prothonotary Kasson said that from evidence taken in court there was coal land in Kingston worth $450,000 an acre. These figures are mentioned to give some idea as to the value of our coal lands.

### Picking To Pieces.

The evil done in this world by those whose highest aims is to speak disparagingly of others cannot be estimated.

The chief occupation in life of some men and women seem to be to find some flaw in the character of others and they are not contented unless they are engaged in picking some one to pieces or saying something that is calculated to make light of another. Often time we hear some one speak evil of others and we are keen to repeat it—we delight in letting our neighbors learn some fault that apparently exists in some one living in the community. We repeat things that we ourselves do not believe is true, but others hearing it from us, do believe it, and circulate it as gospel truth.

L. Gross expects soon to erect a double building on his lot on East street. The building will be about 50 by 60 feet and each side contains nine rooms. The building will have all the modern improvements.

### SUICIDE.

On Thursday night of last week James Turby of Lime Ridge hung himself in his barn. He got up on a box and fastened an end of a rope to a rafter and then probably kicked the box from under him. He was discovered about five o'clock next morning by his daughters. He had been foreman at Low Bros. Lime quarry for many years. His wife's death had a depressing effect upon him, and he had hinted at suicide several times. A jury was empanelled by Coroner F. W. Redeker, consisting of M. I. Low, D. K. Worman, Charles McKamy, H. W. Angle, Josiah Kromer, and George Hughes. They found the facts as stated above. The deceased was buried on Monday.

The following appeal has been sent out. It is signed by the Executive officers of the several states.

We, the Executive Officers of the States and Territories we respectively represent, deem it our duty to present to the people of the United States the following statement for their information:

On the opening of the World's Fair, May 1st, while many of the Exposition Buildings were in an entirely satisfactory condition, exhibits were incomplete and the work of installation had for various reasons been very much retarded. Since that date, the Exposition authorities have accomplished an immense amount of work in Jackson Park, and the buildings of the great departments are complete. Streets and walks are in perfect condition; exhibits from foreign countries and the several states and territories have been received in large numbers and are practically installed, the pavilions, entrances, booths, etc., are elaborate and beautiful and the visitor finds himself in a bewildering maze of exhibits and surrounded on all sides with a display of surpassing magnificence and beauty. In brief, the world has never seen before a collection approaching it in value, interest and educational features. Forty states and territories have contributed $6,020,850 for the erection of the buildings and in aid of exhibitors, and there has been raised for the purpose of the Exposition, exclusive of gate receipts, interest, and the above amount from the States, $26,904,264.55.

The conveniences afforded for quick and easy communication from one part of the grounds to another, by the Intramural Railway, electric launches, and gondolas are excellent, and invalids and others can be transported through the grounds and buildings in rolling chairs in the most comfortable manner.

The Midway Plaisance contains features novel and interesting—a representation of nations of the globe of surpassing interest.

We unhesitatingly affirm that the buildings of the Exposition, State, Territorial and Foreign will make a visit to Chicago the event of your life.

The individual exhibits in the various departments from the several states and territories of the United States and Foreign countries are of wonderful interest and value, and illustrate in a remarkable manner, the growth of the arts, sciences and manufactures. Individual exhibitors, at very great expense and sacrifice, have placed in the Exposition Buildings, evidences of industry, skill and ingenuity, creditable in the highest degree to the artisans, manufacturers and agriculturists of the United States.

The reports industriously circulated that extortion of every nature prevails in Chicago and on the Fair Grounds we emphatically deny from personal experience. In numerous restaurants in Jackson Park, the prices are no higher than are charged for the same variety and quality of food in other cities of the Union.

Comfortable rooms convenient to the Park can be secured at reasonable rates by the day or week, with or without board; and board can readily be obtained at rates not excessive. It is the opinion generally expressed by those who have visited the Fair that they were agreeably surprised not only in the completeness, variety and extent of the exhibits but in the reasonable charge for room and board.

The educational features of the Fair and the evidences of wonderful progress made in this country since its discovery are of sufficient importance to incite all to see the Exposition. It is an opportunity never before given to our people and probably never will be again. A single admission fee of fifty cents admits to the Grounds and to all the Exposition Buildings proper.

We have presented fairly and truthfully the condition of affairs at the Exposition.

Certain it is that the *Argus* deserves and merits the patronage of the people of the county, especially that part lying north of Bloomsburg and commonly designated as the "Upper End." The *Argus* office is excelled but by a single plant in the county, that of the COLUMBIAN, and as a newspaper will stand a comparison with any weekly journal published in this section of the state, thus placing Benton in the front rank among the leading inland towns and giving to the "Upper End" a newspaper of which all can feel a just pride. The *Argus* does not entrench upon the field occupied by other papers in the county, neither does it enter their domains to solicit advertising at less than regular rates merely for the sake of depriving other journals of their legitimate patronage. The *Argus*' motto is to live and let live, but if the dog in the manger policy is to be pursued against it, it will assert its rights in a manner not to be misconstrued and then "somebody will wish he hadn't done it.—*Benton Argus.*

### A Sporting Parson.

Rev. J. R. Kashen, says a Bloomsburg dispatch to the Philadelphia *Press*, is the pastor of the Swinburne, church Columbia county. About a month ago he bought a blooded horse with a good record. The preacher's flock were horrified to-day to learn that their pastor had raced with Dr. Horning for a wager. The doctor had agreed to forfeit $200 if his horse could not do a mile in better time than the parson's nag. The parson won the $200. The church members have held an indignation meeting and asked their pastor to resign or return the money. According to Mr. Kashen the doctor wanted to make him a present and took this particular way of doing it. She was taken to the insane asylum at Tyrone.—*Milton Record, June 23.*

The above is badly mixed. There is no Rev. in this county by the name of Kashen, no town by the name of Swinburne, and no doctor by the name of Horning. The conclusion of the article is not explained, the reader must infer whether it was the preacher, the doctor or the horse that was taken to the insane asylum.

Congressman Mutchler of Easton, was buried on Monday. A large number of distinguished people attended the funeral.

Judge Samuel S. Dreher of Stroudsburg died suddenly last Monday, aged 69 years. He was a nephew of the late Frederick Dreher of this town, and was one of the best known judges in the state.

Since dollars are coined out of sixty cents' worth of silver, it is no wonder that counterfeiters have turned honest and are getting out dollars containing the same amount of silver as the genuine, and undistinguishable from the mint issue. In former times when a silver dollar was worth 100 cents, counterfeiters had to use baser metals, which soon led to their detection. But when the government itself gives a fictitious value to its coinage, who is there to deprecate the acts of individuals who issue a dollar of the same value as the government.—*Scientific American.*

The New York *Sun* makes some sensible remarks on Chief Justice Fuller's decision in the World's Fair case. It says: "To appreciate the importance of the Chief Justice's opinion, it is only necessary to consider what a decision the other way would have signified.

It would practically have held the Government of the United States responsible for the pecuniary affairs of the Exposition. If the right of the Federal Government to dictate as to the management of the Fair has been established, the Chicago people could have gone to Congress next winter with a very strong case, demanding an appropriation from the United States Treasury to cover every dollar of deficit.

More than that, it would have practically asserted the supreme authority of the Federal Government in regard to matters which, under the Constitution, belong to the States. It would have been the longest and most dangerous step toward centralization since the reconstruction period.

Every American citizen ought to rejoice at the decision of the Court of Appeals, whether he believes that Sunday opening is a good thing or a bad thing for the people."

## Tuesday's Cabinet Meeting.

### THE NEW PHASE OF THE SILVER QUESTION DISCUSSED AT LENGTH.

WASHINGTON, June 28.—Two hours were consumed by the cabinet to-day discussing the new phase of the silver question and other matters demanding attention. The two conferences yesterday afternoon and evening between the President and Secretary Carlisle simplified matters to some extent. Although the discussion, it is said, took a wide range, it was necessarily brought back to one important and unmanageable point—that the executive had no power in the premises, congress alone being able to deal with the measure for relief. It was plain to the cabinet that the monthly purchase of silver must be continued or else congress must be convened in special session immediately. As the President had decided to call congress together in the early part of September, to deal with the financial situation, and manifested no intention of changing his stated purpose, the project of an earlier session of congress, it was understood, was dropped. So far as the continuance of the purchase of silver bullion under the Sherman law was concerned, it was pointed out that little more than two months remained before congress would convene in extra session and that during the intervening time the silver to be purchased would be only nine million ounces, a comparatively small amount in view of the previous purchases. The best way to deal with the question was to wait the course of events for two months longer. This view was generally agreed to and the meeting adjourned.

## WASHINGTON LETTER

WASHINGTON, June 26, 1893.

President Cleveland hopes to join Mrs. Cleveland and Ruth at their Buzzard Bay cottage the latter part of this week, although he has so much to do that he cannot make the trip one of rest and recreation. He will simply transfer the executive office from the White House to his seaside cottage, in order that he may work with more comfort and fewer interruptions and at the same time be with Mrs. Cleveland during the period that every affectionate husband likes to be with his wife.

He told Representative Richardson, of Tennessee, who was chairman of the committee on Printing in the last House and who will probably occupy the same position when the present House is organized, that he would not appoint the new Public Printer for some time. The delay in the appointment of this official is believed to be largely due to a desire to perfect a plan for the entire reorganization of the Government Printing office as soon as the change is made.

Representative Catchings, of Mississippi, who was a member of the House committee on Rules in the last Congress, says some radical changes will have to be made in the House rules if difficulty is to be escaped in carrying out the pledges of the party. Rules that will prevent more than a reasonable time being consumed in fillibustering are what will be needed to carry out the democratic legislative programme.

Representative Tarsney, of Missouri, created a sensation in the House a few weeks before the adjournment of the last session of Congress by declaring that under Raum's administration of the Pension Office pensions had been granted for no other disability than the loss of hair. Republican members of the House bitterly denied the statement and called upon Mr. Tarsney to give the name of his informant, and the next day Raum sent a letter to Representative Grout, of Vermont, officially denying that a pension had ever been allowed for baldness, and again Mr. Tarsney was asked to give his informant's name. Mr Tarsney replied by saying that his informant was an employee of the Pension Office and would at once be dismissed if his name were mentioned. He added however that he believed the statement to be true and said: "I make this pledge to the House; that at the very first opportune moment it can be safely done, I shall, by the files and records of that Office, prove the truth of my informant's statements, or hold him up to the scorn of the House and the country as a falsifier, a character I do not believe he deserves." Two days before the inauguration of President Cleveland Dr. Warren Holt, of Missouri, a medical examiner in the Pension Office, was dismissed under the charge of having given false information to Representative Tarsney. Now for the sequel: This week quite accidentally a case was discovered that proved Mr. Tarsney's statement to have been strictly true and the dismissal of Dr. Holt to have been unjust—he has been reinstated. The case is that of Allen G. Peck, of Co. H. 1st R. I. Light Artillery, who was allowed a pension Oct. 19, 1891, to be dated from March 1, 1884, of $4 a month, the only disability alleged being "loss of hair; result of typhoid fever." Whether there are other men drawing pensions for baldness remains to be seen, but Mr. Peck will draw no more money on that account.

Secretary Morton says his recent trip to Nebraska convinced him that the populist party is rapidly disintergrating in the northwest and that the democrats of that section will never consent to a fusion with such a party. He thinks that if any party combines with the populists it will be the republicans in a few of the populists it will be the republicans in a few of the southern states.

Next Friday will close the present fiscal year and instead of the eight or ten million deficiency which was estimated by Raum there will remain unexpended more than $1,000,000 of the pension appropriation.

It is understood that Sec. Lamont's action in revoking his recent order appointing an army Court of Inquiry to inquire into Col. Ainsworth's connection with the accident at Ford's old theatre was the result of a conference with President Cleveland, and that it had been definitely decided not to suspend Col. Ainsworth until the courts decide whether he is guilty or not. He will be indicted by the grand jury this week.

There is nothing mugwumpish about Mr. Dayton, the new postmaster of New York City, who has been in Washington several days attending to the filing of his bond and other official matters. Speaking of the appointments to be made in his office, outside of the classified service, he said: "In making appointments to these places I shall put in democrats as a matter of course. Mr. Cleveland did not appoint me with the idea that I would appoint republicans.

Impure blood is the cause of innumerable maladies. Hence, one of the greatest benefactions to humanity was the discovery of Ayer's Sarsaparilla, which, more than any other medicine, has saved America from becoming a nation of invalids.

## HON. WILLIAM MUTCHLER'S DEATH.

**Heart Disease Ends the Career of Easton's Prominent Attorney.**

## The Farmer's Hope.

Our elevators are bursting with wheat for which the farmer can command but little more than 60 cents a bushel. There are in Europe alone, if we may credit the statement made by the late Secretary of Agriculture, Mr. Rusk, 150,000,000 people who never eat wheaten bread. In the one country is an immense supply of visible food waiting for buyers. In the other countries are millions who go to bed hungry. Between them ply ferryboats with freight charges reduced to a minimum. What prevents an exchange that means benefit to both sides, needed food to the one and needed markets to the other?

Not the sea, for it costs no more to send a bushel of wheat abroad than to send a letter in the mail, but the McKinley bill, which takes from the farmer, or his middleman, one-third or one-half of the commodities for which he might exchange this surplus wheat in foreign markets as a fine for not buying those commodities from some protected home producer.

It is clear, then, that whatever direct benefits may come to classes from release of taxes on the necessaries they consume or on materials with which they work, the great general good to be sought in tariff revision is a healthy expansion of foreign commerce. This was the immediate result of the Walker tariff in 1846. During the twenty-five years previous our foreign trade had not doubled. In 1822 it was $141,000,000. In 1846 it had grown to $227,000,000, an increase of but 60 per cent.

Under the low revenue tariff enacted in that year it swelled by 1860 to $687,000,000, a growth of more than 220 per cent. in fourteen years. More significant and instructive still was the increase in the tonnage of American shipping engaged in the foreign trade. For thirty years prior to 1846 it had been nearly stationary. In that year it was only 943,307 tons, almost 40,000 less than in 1810. By 1860 it reached 2,379,396 tons.

These figures speak volumes, but their chief encouragement is for those who produce the surplus products that must have other markets besides our own for remunerative sales.

The tariff of 1846 made a vent for our surplus products by opening a market for the things which, and which alone, other peoples had to exchange for them. Yet this rapid expansion of imports brought no distress to home manufacturers. On the contrary, after eleven years' experience of that tariff they assented, almost unanimously, to a further decrease of 20 per cent.

The party of low tariff and revenue duties is not about to try a new and dangerous experiment. It has no new fangled theory which it wishes to test upon the body politic. It has not only the support of reason but this solid justification of experience in the reform it proposes to make by purging our laws of the duties that smell of monopoly and rescuing the sovereign power of taxation from private control. —*World.*

## Pennsylvania People Benefitted.

MRS. CARRIE BOUTON GAINED IN FLESH 68 LBS. TO 121 1-2 LBS. BY THE USE OF A SIMPLE REMEDY.

MEN AND WOMEN INTERESTED.

"It is astonishing," said one of our physicians the other evening, "how many of the ordinary diseases people suffer from come from the one cause—excess of uric acid in the blood. To discover a medicine that would dissolve this acid has puzzled thousands of the best men of the medical profession, until Dr. David Kennedy, of Rondout, N. Y., produced what is known the world over as Dr. Kennedy's Favorite Remedy. The great value we place in Favorite Remedy comes from the fact that it is the only medicine that will effectually dissolve this acid thus curing rheumatism, dyspepsia, kidney, liver and urinary troubles and the sicknesses women suffer from. These and many more troubles all come from the one cause, as I said before, this death-dealing uric acid."

Perhaps there has been no one person in Wyoming Co., Pa., that has suffered more than Mrs. Carrie Bouton, formerly of Schottville, but now of Harvey's Lake, Luzerne Co. Mrs. Bouton, in relating her restoration to health, said: "From a growing girl I suffered from female trouble or weakness peculiar to my sex. Several physicians prescribed for me but I found no relief. I was reduced in flesh down to 68 pounds. By accident I heard of Dr. Kennedy's Favorite Remedy and determined to try it, and to my great joy I began to realize that I had found a medicine that was doing me good. I think I had used five bottles when I found that I weighed 121½ pounds and was better in health than I ever was before.

Inquiry among Mrs. Bouton's neighbors shows that she states nothing but the facts in regard to her case. Many other instances of the kind are widely talked of in Scottsville, Tunkhannock, Wilkesbarre and other places where Dr. Kennedy's Favorite Remedy has effected many cures after physicians had given up hope.

"But," says one of our prominent druggists, 'Favorite Remedy is equally efficacious in other diseases, as talks with people I have sold Favorite Remedy to affirm. To my knowledge right in our town Favorite Remedy has cured people suffering from rheumatism, dyspepsia, kidney, liver and urinary troubles."

Since the publication in one of the New York medical journals of the case of Mr. E. P. Tayer, of East Nassau, N. Y., Dr. Kennedy's Favorite Remedy has been increasing in sale. Mr. Tayer had suffered for fifteen years with inflammatory rheumatism. His case was practically abandoned by his physicians. Favorite Remedy was brought to his notice and in less than three months after its use he was a well man.

In commenting on this case Dr. W. H. Morse, of New York City, says: The great good in Favorite Remedy lies in its power to dissolve this deadly uric acid. In cases of dyspepsia, eczema, scrofula or any urinary diseases I have never known it to fail, when taken according to directions. Dr. Kennedy's Favorite Remedy is not only used by physicians now but can be found on sale by every medicine dealer.— *Wilkes-Barre (Pa.) Times.*

In commemoration of the event of declaration of independence by the Reformed church of the United States of the Reformed church of contmental Europe, especially of Holland, centennial services were held at St. James on last Sunday forenoon. This was one of Rev. Houtz's best efforts. The people who congregated filled the church to its utmost capacity and not nearly all gained admittance, listened with marked appreciative attention to the grand historic discourse of the Reformed church in all the phases of her growth and development from her origin at the reformation to the present time. The church was elaborately and tastefully decorated, especially the altar and wall back of the pulpit. Large gilded letters and figures were arranged to read "1793—1893" and "Centennial of the Reformed Church of the U. S." The committee on decoration deserve congratulation for their skill in decoration. Any one reading Psalm CXXXVII—5-6 will read the theme chosen for the occasion.

In view of the fact of extensive decorations for centennial services it was decided to have Children's Day on Saturday night previous. On this occasion also the people could not all gain admittance. This was a grand exhibition of the children who enjoyed the exercises as much as the appreciative and elated audience. The music was suberb and the best of order prevailed throughout. Both occasions were special services that demanded special thank offerings.

### MR. FARR'S FREE TEXT BOOK BILL

**Many Letters of Inquiry as to Its Exact Provisions.**

HARRISBURG, June 27.—The fact that Representative John R. Farr, of the Lackawanna district, made himself popular throughout the state during his two terms as a member of the lower house of the state legislature, is evidenced by the large number of letters of inquiry received here, asking for the exact provisions of his free text book bill which passed both houses of legislature during the last session. The measure which provides for free books and other school supplies is classed as one of most important and beneficial that has become a law in this state in many years.

As a considerable portion of Mr. Farr's life has been devoted to educational work, it seems that he has hit upon the right idea for a general benefit to the people of his native state. Mr. Farr is editor and proprietor of the Scranton Courier-Progress, is a staunch republican in politics, and in 1892 was re-elected to a seat in the house by a majority of 627 without his name appearing upon any ticket. He was elected by the use of "pasters." His free text book bill was the first bill of the kind passed in the Pennsylvania legislature.

Dozens of applicants responded, and to each a typewritten letter was sent, requesting the deposit of a sum of money, ranging from $5 to $100, to be forfeited in case of insincerity.

James Lubkin, of Gaston, W. Va., who had invested $100 in the swindle, appeared here and instituted a search for Miss Markay, but without success. At the post office he learned that Miss Markay's letters were put in J. Jefferson Galland's box, and the game was soon exposed. Lubkin entered suit against Galland for the amount of his loss, and interesting developments are expected. Mr. Galland has borne an excellent reputation hithertofore.

RIDGWAY, June 23.—The Ridgway bank, a private institution, yesterday posted the following notice on its doors:

"Owing to the present depressed financial situation, rendering it impossible to realize on securities of any kind, and, therefore, being unable to meet all obligations, we have decided that it is for the best interests of all creditors of the Ridgway bank to close its doors. We believe the assets to be in excess of the liabilities, and that all depositors will be paid in full as soon as the assets can be realized. A full statement will be given to the public as soon as the same can be prepared."

The notice was signed by D. C. Oyster, president and I. D. Bell, cashier. A gentleman, who was in close consultation with the officials of the bank during the night, estimates the assets at $364,000 and the liabilities at $216,000. This bank had the confidence of the working people, many of whom have all their wealth in the bank's care.

EASTON, June 26.—The following resolutions were adopted Saturday afternoon at the meeting of the Bar Association of Northampton county relative to the death of Congressman Mutchler:

"The members of this association have learned with profound regret of the death of Hon. William Mutchler, our fellow-member, and offer this tribute to his memory. His was a life of unusual influence and prominence, and his death is a marked loss to the bar, society and the country. Mild in manner and retiring in disposition, yet his life was an aggressive force, far-reaching and beneficial. Gentle and conciliatory in all his acts, yet in his influence strong and assertive.

"As a citizen he was a living good to his community; as a representative a strength to his party and a benefactor to his country; as a lawyer clear, faithful and profound; as a man honorable, courteous, kind-hearted and true. To his friends a living pleasure; to the community a constant benefit; to the bar deservedly an ornament, his death is a public loss."

KANE, June 26.—The second section of freight train No. 59 was wrecked about six miles west of here. Four sailors who were en route from Baltimore to Erie were stealing a ride in a box car, and two of the number, Harry Tray and John Stewart, of Philadelphia, were instantly killed, the former's body being literally ground to atoms. J. Kennedy, of Hartford, Conn., and Thomas Nolan, of Baltimore, were seriously hurt, but may recover.

The men had been shipped from Baltimore to join their boat at Erie, but at Benovo they stopped over and spent all the money provided for their car fare at a bar and chose to steal transportation to their destination rather than walk. Fifteen cars were totally wrecked and the tracks were blocked for several hours. The accident was caused by the breaking of a wheel on one of the cars.

## A WOMAN'S REASON.

**She Was Afraid of What People Would Say.**

A man and a girl were sitting together in the soft dusk of a gentle summer evening. She was trifling with a bit of embroidery, now gently chafing him, now humming a bar of song; while he sat silently watching her and smoking his pipe.

They were very old friends, for the man had watched the girl grow from childhood into womanhood. He was but five years her senior, yet she seemed more than five years younger to him.

His first feelings toward her had slowly changed with her increasing years to one of extreme fondness, and then another change had come, but he had not told her of his love.

As he watched the delicate outline of her face, softened into even unusual sweetness by the waning twilight, he felt happy beyond expression. He caressed his pipe as his thoughts went back over the long span of their friendship. He remembered noting every action of hers that had bespoken a budding love for him. Her sisterly reproofs—well he knew how sisterly they were—her anxiety about his inveterate smoking, her little jealousies; all her expressions of fondness for him came before his mind.

Yet sometimes she seemed to relish the cub admiration that her youthful neighbors bestowed upon her. But then probably she had not guessed of his love, and perhaps a word was needed to light hers.

But that evening she would learn all. Perhaps it was too soon, but—well, he loved her. For a moment fleeting dread unnerved him:—but no, surely no one else had talked of love to his little sweetheart.

He covered her little soft warm hand with both of his, and he looked deep down into her gentle eyes.

"Dear, we have been friends so long that it seemed as though no change could ever come. But a change has come. You have always had my friendship, darling, but now you have taken my heart. Can you give me yours?"

She turned her head away. "But you must take it back, please. I cannot give mine for it."

Then came a few moments of silence, and his face aged as he stared out into the lonely darkness.

He heard her voice again, "Just think what people would say"—his face darkened and his brow lowered with a proud frown as he turned his face toward her—"if it was generally known that I had a tobacco heart."—Brooklyn Life.

**He Didn't Bring It Home.**

After the return of the drummer from his travels his young wife explored his grip with an expectant face. Failing to find that of which she was apparently in search, she turned to him and said:

"Where is the jag?"

"The what?" he asked in astonishment.

"The jag. Mrs. Laces says her husband saw you in Chicago with a lovely jag on. Whatever it is, you are not wearing it, and it isn't in your grip."

"O, that's all right. I left it at the office. By the way I saw a handsome spring hat in a milliner's shop down town. If you care we will go down town and you can look at it and if you like it you can have it."—N. Y. Press.

## POINT LACE AND SEALING WAX.

**Renaissance of Elegant New Old Fashions in Polite Society.**

All sorts of old-fashioned gentle arts are revived in the great renaissance. There is the wearing of old laces, which calls for a fine and accurate knowledge of meshes and patterns and a refined taste in preferring a bit of adornment that is real and beautiful in itself rather than a profusion of machine-made decoration. Even in the days of the greatest decadence in the wearing of lace, when the precious lengths of gossamer thread were folded away in blue paper in many a woman's treasure box, there was a certain caste of literary gentlewomen that made of it almost an insignia of rank, as it was always a feature of their full dress. Julia Ward Howe wears a bit of old point plaited in the neck of her plain black gown, and another woman reformer carries to the meetings when she presides a priceless fan with mother-of-pearl sticks and a cover of point duchesse. Another gentlewoman of the old school, reduced in circumstances, adds an indisputable touch of gentility to her plain, home-made gowns with a scarf of point or frills of fine old Brussels lace, which, with her quaintly set old-fashioned diamonds, small but brilliant, somehow makes the most modish French gowns look crude and commonplace beside her plainer attire.

Now another old new fashion, survival of the days of elegant ease and moderation, is that of sealing letters with wax stamped with one's seal or crest. Any woman can scribble off the modern note and fasten the gummed envelope without much care, but there is something individual in the seal. It calls for deliberation, is opposed to vulgar haste, and savors of graceful leisure and elegance. The new sticks of wax are large like the old ones; the seal is large and round and requires deftness in manipulation, which distinguishes the note elegant from the grocer's bill or the business letter. The taper in its silver stick is a pretty addition, too, to the writing table.—N. Y. Sun.

## THE BEAUTY OF LONDON FOGS

**And Other Artistic Attractions a Frenchman Notes of the Great City.**

M. Augustin Filon, in an article on the buildings and characteristics of the British metropolis contributed to a contemporary, has discovered that a London fog, with the sun trying to filter through it, is idealistic and suggestive, as well as sometimes more artistic in its effects than the monotonous luminosity of the south. A Thames fog, in fact, bathes London landscapes in a charming vagueness of outline. London, on the whole, is, in the estimation of the French author, an admirable city, despite the ugliness of its monuments and the sordid leprousness of its slums. Its parks are not gardens, but woods and meadows, bits of living nature thrown like oases into the desert of bricks and mortar. Even if Londoners had the folly to build in Hyde Park or Regent's Park, they would always have the Thames, so rich in varied aspect that an artist once said to the writer on a steamboat between Gravesend and London Bridge that he had seen during the river journey two hundred pictorial masterpieces.

There is likewise a subject for wonder, according to M. Filon, in the immensity of the place which imparts a special sensation and gives the idea of a life completed, and at the same time peaceful, laborious, subdued and submissive to law. The French author has also some interesting remarks to offer on London buildings of note. A Parisian in London took the Law Courts for a big church, and made the same mistake about Whitehall. M. Filon calls St. Pancras Station a feudal chateau of the beginning of the sixteenth century, while Euston is a Babylonian or Cyclopean building resembling the tomb of a prehistoric conqueror.—London Telegraph.

## INSECTS AND FLOWERS.

**Explanation of the Peculiar Brilliancy of the Flora of the Higher Alps.**

A curious instance of what might be called a device of nature to secure the continued existence of certain forms of life under disadvantageous circumstances has recently attracted attention in a discussion of the brilliancy of the colors of Alpine flowers. It is known that insects are most important agents in the fertilization of flowers, and this is true of the flowers that bloom among the snows of the Alps as well as of those that cover the meadows far below.

But it has been observed, at the same time, that the bees and butterflies which ascend the mountains in order to visit the brightly colored flowers growing there perish by the thousand in the sudden cold that envelopes the peaks and glaciers at nightfall.

It is only the extraordinary attractiveness of the beautiful mountain flowers that induces their insect admirers to venture into the perilous realm of snow and ice.

Here then, according to the view of Doctor Jolly, the principal of the survival of the fittest in the struggle for existence comes into play. Those Alpine flowers which possess the most vivid colors succeed in attracting the insects whose visits are essential to their propagation, while the less beautifully colored blossoms are neglected.

The result is that only the brighter flowers are able to survive, and hence the peculiar brilliancy of the flora of the high Alps.—Youth's Companion.

### Steel Barrels.

The manufacture has been commenced, at Barrow, of steel barrels for the carriage of petroleum in the place of wooden casks. The barrels are made in halves by means of dies and compression while the thin plates of steel are hot. These halves are welded together by means of electricity, and the barrels, when produced, are to be used in the petroleum trade in hot climates. The new process is one possessing great interest, not only to those engaged in steel manufacture, but to those engaged in the shipping trade, and particularly the bulk petroleum trade.—Scientific American.

## FIRESIDE FRAGMENTS.

—Breaded Omelet.—Put into a stewpan two tablespoonfuls of rich milk. Sprinkle in one tablespoonful of salt and half a tablespoonful of pepper. Stir until the crumbs have absorbed all the milk; take from the fire, and let the mixture cool, and then beat it up with six eggs, and fry like other omelets.—Old Cook Book.

—Sugar Cookies.—Two cupfuls of sugar, two eggs, one-half cupful of butter, one-half cupful of fried meat gravy or drippings, one-half cupful of sweet cream, one-half teaspoonful of soda. Before baking, dip the top of each cooky in the white of egg, then in granulated sugar. The white of the egg is not to be beaten.—Housekeeper.

—Canned Rhubarb.—There is nothing which keeps so easily in cans as rhubarb. Fill perfect cans with the sliced stalks, crowding them down firmly. Put the cans in a cool place and fill with cool water, and leave over night. Examine the cans the next day and see that they are full to the brim, then screw on the tops and treat like canned fruit. I have used it when two years old which was as nice as the fresh vegetable.—Rural.

—Stewed Sweetbreads.—Parboil and carefully remove the skin without breaking the sweetbreads, put them into a stewpan with two ounces of butter, a tablespoonful of chopped parsley, one clove, one bay leaf, a teaspoonful of Worcestershire sauce, a half teaspoonful of salt and a half pint of white stock. Set the pan over a moderate fire and simmer for thirty minutes. Dish the sweetbreads. Wash a pint of French peas in cold water, add them to the sauce, let the whole come to a boil, skim all the fat from the surface, and pour the sauce and peas around the sweetbreads.—N. Y. Observer.

—Beef Olives.—Cut one and one-half pounds of beef in strips three inches wide and four long. Add to the chopped trimmings and fat, salt, pepper, three tablespoonfuls of cracker powder, one teaspoonful each of sage and savory. Spread on strips, roll up and tie with twine. Roll them in flour. Fry quarter pound till brown, remove it and put olives of beef in the fat. Fry brown, then put in a covered pan. To fat add one tablespoonful of flour and rub smooth. Add one and one-half pints of boiling water. Season to taste, pour over olives and simmer two hours. Cut strings, and pour gravy over dish of olives.—Good Housekeeping.

Graham Shortcake.—One and one-half teacupfuls sweet cream, two teacupfuls graham flour, two large teaspoonfuls baking powder and one-half teaspoonful salt. Mix lightly together and roll out two round cakes, one-half an inch thick. Lay one on a buttered tin, brush over the top with melted butter and lay the other cake on it. Bake in a quick oven. When done remove the upper layer, spread with butter and then with a layer of sweetened rhubarb, strawberries, or any kind of sweetmeats one has at hand, on both the layers. Eat warm, preferably with cream and sugar, though it is nice without.—Orange Judd Farmer.

—Orange Ice Cream.—To make an orange ice cream grate the peel of three Valencia oranges into a pint of boiling milk. Be careful to use only the yellow peel, none of the bitter white peel that lies underneath. Add the juice of the oranges, mixed with a cup of sugar and the yolks of six eggs. Stir the boiling milk gradually into the eggs. It must not curdle. Add a pint of perfectly fresh cream, and if the mixture is not a good yellow a drop or two of the yellow French coloring liquid used by confectioners and caterers. These vegetable colorings are perfectly safe, and often add considerably to the appearance of the dish. Freeze the ice cream as usual, and dish it out in little round forms, about the size of small oranges.—Boston Budget.

### A Unique Motive Power.

Accounts come from Germany that Krupp, the famous gun maker, is now building a number of experimental engines to test a novel idea. According to Hardware, a German inventor has taken patents on the utilization of the general principle that finely divided carbonaceous matter floating in the air readily explodes. He proposes to grind coal to an impalpable powder, and after introducing the dust floating in the air into the cylinder of an engine, explode it, the idea being to follow very much the same lines which are being so thoroughly developed in the use of gas in engine practice. Naturally, the first question which has risen has been how to get rid of the ash. Krupp is reported to have stated that his experience in gun manufacture convinces him that this is not a serious obstacle. The advantages which would grow out of a direct utilization of mineral fuel as mined are very obvious. While modern practice converts only 10 to 15 per cent. of the heat energy stored in coal into power at the crank shaft of a steam engine, it is believed that no less than 75 to 80 per cent. could be made available by the direct combustion of fuel through explosion of coal dust.—Mechanical News.

### An Alligator's Nest.

Alligator's nests resemble haycocks more than anything else to which they can be compared. They average about four feet in height and about five feet in diameter, and are constructed of grasses and herbage. First the mother 'gator deposits one layer of eggs on a mortar-like floor, and having covered this with a stratum of mud and herbage about eight inches thick, lays another set of eggs upon that, and so on to the top, there being commonly from 100 to 200 eggs in a nest. With their tails the parents then beat down the tall grass and weeds, to prevent the approach of unseen enemies. The female watches her eggs until they are hatched by the heat of the sun, and then takes her brood under her own care, defending them and providing for their subsistence. Dr. Lutzenburg, of New Orleans, once packed one of these nests for shipment to St. Petersburg, but the young hatched out before they were started on the long voyage, and were kept about the doctor's premises, running all over the house, up and down stairs, whining like young puppies.—Harrison's Monthly.

**The Best Medicine.**

J. O. WILSON, Contractor and Builder, Sulphur Springs, Texas, thus speaks of **Ayer's Pills:**

"**Ayer's Pills are the best medicine I ever tried;** and, in my judgment, no better general remedy could be devised. I have used them **in my family** and recommended them to my friends and employes for more than twenty years. To my certain knowledge, many cases of the following complaints have been completely and

**Permanently Cured**

**by the use of Ayer's Pills alone: Third day chills, dumb ague, bilious fever, sick headache, rheumatism, flux, dyspepsia, constipation, and hard colds. I know that a moderate use of Ayer's Pills, continued for a few days or weeks, as the nature of the complaint required, would be found an absolute cure for the disorders I have named above."**

"I have been selling medicine for eight years, and I can safely say that **Ayer's Pills give better satisfaction than any other Pill I ever sold."**—J. J. Perry, Spottsylvania C. H., Va.
